Information regarding the charging plug

The charging plug of your Wallbox, which is sealed with the cover cap, is protected against splashing water in accordance with protection class IP54. This is indicated by the number 4 in the protection class rating.

In the worst case scenario, heavy rain can cause rainwater to collect in the protective cap and consequently corrode the electrical plug contacts.

We recommend that you do not put the protective cap onto the charging plug after using the Wallbox. Wind the charging cable around the Wallbox and let the plug hang down, open.

Better still, use the TECHNIVOLT cable and plug holder 0000/6340 to safely protect the charging plug against environmental influences.

**Cable and charging
plug holder, type 2**

Part. no.: 0000/6340
